

Women's Shoe Sizing Chart

Download and print this PDF to assist in determining your correct shoe size. See further instructions below.

Print and Prepare Chart

Print this PDF at 100%. Make sure your printing properties are **NOT** set to "Fit to Page" or make sure page scaling **IS** set to "100%" **OR** "none". Check the accuracy of your printout by measuring the inch markings along the left side. Then overlap and align the top and bottom sheets and tape together.

Size Your Foot

Remove your shoes and place the heel of the foot you want to measure in the indicated spot at the bottom of the chart. Then line up the outside of your foot with the dotted line on the appropriate

side of the chart for the foot you are measuring (right for right foot, left for left foot).

Size

Your foot length is the size indicated at the top by the mark that lines up with your longest toe. If you are between sizes, use the larger one.

Width

If the inside of your foot crosses the vertical line that is your shoe size, you might consider a wide shoe (W). If your foot is within the vertical lines, select a medium shoe (M).
